I'm a stack agnostic software engineer with a Computer Science degree and 2 years of technical experience. I've hatched some skills in building and monitoring cloud services, managing legacy software and databases, and working with modern front-end frameworks like Vue and React. I'm looking for a remote role where I can wear many hats and never be bored!

CHELSEY MACHIN

EXPERIENCE

April 2022 - Present

Software Engineer • Platform Services Team • Jamf

- Designed platform services portal for internal use utilizing Vue.js/Nuxt and pre-existing AWS cloud resources as a back-end
- Created and managed service dashboards, alert metrics, and performance baselines for cloud resources
- Helped mentor interns and onboarding engineers to the team's codebase and workflows
- Partnered with an existing product team to update their large-scale application from Vue 2 to Vue 3, tracking all bugs through rollout
- Helped design and implement full AWS cloud resource services utilizing DynamoDB, Lambdas, and build templates for easy CI/CD and management
- Presented new features and practices to stakeholders and peers during sprint reviews

June 2021 – April 2022

Software Developer • Burkhart Dental Supply

- Created and solved project tickets according to stakeholder needs
- Utilized Azure DevOps to maintain enterprise repositories, CI/CD pipelines and workflows, and integration with other enterprise applications
- Helped rebuild entire DevOps structure after major cybersecurity incident
- Helped rebuild and integrate large, pre-existing enterprise applications after major cybersecurity incident
- Assist the development team with all aspects of software design
- Worked on upgrading Vue 2 production application to Vue 3
- Designed and maintained Vue components for a corporate design system
